

CHAITANYA BHARATHI INSTITUTE OF TECHNOLOGY (A)
DEPARTMENT OF AI&DS

Project Batch No: CBIT/AI&DS/2026-27/ Batch No (16)
Weekly Status Report

Project Title	Veridion - Enterprise Agentic AI Platform for Vendor & Procurement Management		
Names of the Students with H.T.No(s)	1) Kovvuri Rishi Kesav Reddy (160123771045) 2) Ravanam Naga Vinod Naidu (160123771060) 3) Manasani Shreeya (160123771302)		
Area of work	Project requirement analysis, literature survey, problem statement definition, technology stack finalization, system architecture design, workflow planning, database schema planning		
Name of the Project Guide	Ms. Talla Sai Sree		
Work carried out for the week	1) Finalized the overall system architecture of Veridion, including the frontend, backend, PostgreSQL database, Neo4j graph database, and Agentic AI service layer. 2) Designed the complete database schema with procurement, vendor management, AI decision, payment, notification, and authentication modules. 3) Completed the architecture and workflow for the 8 specialized AI agents responsible for OCR, semantic matching, compliance verification, fraud detection, vendor risk scoring, quotation ranking, vendor communication, and decision making. 4) Designed the Context Gate Decision Engine, including the confidence-weighted formula for combining outputs from multiple AI agents. 5) Defined the end-to-end procurement workflow from vendor registration to quotation management, purchase order generation, invoice verification, dispute resolution, payment processing, and reporting.
